Other Public Health Emergencies

• There is no there, it is what it is – COVID and other pandemics/endemics
• How are you going to protect your people and keep the operation running?
• Appropriate utilization of expensive and high intensity care (response to high intensity needs)
• Strategies have to be resilient enough to deal with the constant change
• Can’t continue in the constant churn, need a plan on each of the 5 tenets
  • Encourage people to lean into treatment of chronic conditions
  • Remove barriers
  • Make sure people stay engaged and don’t become anxious and depressed
  • End of the day, dealing with a lot of issues but also have to have a strategy that’s appropriate for each person in 2023 and beyond
