Innovations to prevent and treat disease have led to impressive reductions in morbidity and mortality.

Irrespective of remarkable clinical advances, cutting health care spending is the main focus of reform discussions.

Underutilization of high-value care persists across the entire spectrum of clinical care.

Our ability to deliver high-quality health care lags behind the rapid pace of scientific innovation.
Moving from the Stone Age to the Space Age:
Change the health care discussion from “How much” to “How well”

- Everyone (almost) agrees there is enough money in the US health care system; we just spend it on the wrong services
- Moving from a volume-driven to value-based system requires a change in both how we pay for care and how we engage consumers to seek care
- Consumer cost-sharing is a common policy lever
Americans Do Not Care About Health Care Costs; They Care About What It Costs Them

Patient Worry About Out-of-Pocket Healthcare Costs at All-Time High

A report from the Commonwealth Fund noted that patients are not confident they can afford high out-of-pocket healthcare costs.
Out-of-pocket spending among people with large employer coverage, Paying More for ALL Care Regardless of Value

Source: KFF analysis of data from IBM MarketScan Database and the KFF Employer Health Benefit Survey
I can’t believe you had to spend a million dollars to show that if you make people pay more for something, they will buy less of it.

• Rising copayments worsen disparities and adversely affect health, particularly among economically vulnerable individuals and those with chronic conditions
Alternative to “Blunt” Consumer Cost Sharing: Value-Based Insurance Design (V-BID)

- Sets consumer cost-sharing on clinical benefit – not price

- Little or no out-of-pocket cost for high value care; high cost share for low value care

- Successfully implemented by hundreds of public and private payers

Putting Innovation into Action: Translating Research into Policy
ACA Sec 2713: Selected Preventive Services be Provided without Cost-Sharing

- Receiving an A or B rating from the United States Preventive Services Taskforce (USPSTF)
- Immunizations recommended by the Advisory Committee on Immunization Practices (ACIP)
- Preventive care and screenings supported by the Health Resources and Services Administration (HRSA)

Over 137 million Americans have received expanded coverage of preventive services
Medicare Advantage V-BID Model Test: Expanded Opportunities

Permissible interventions:
- Reduced cost-sharing for:
  - high-value services
  - high-value providers
  - enrollees participating in disease management or related programs
  - additional supplemental benefits (non-health related)

Chronic Disease Management Act of 2019

S.2410 and H.R.4978
Bipartisan, Bicameral Legislation

To amend the Internal Revenue Code of 1986 to permit high deductible health plans to provide chronic disease prevention services to plan enrollees prior to satisfying their plan deductible.
Chronic Disease Management Act of 2019

115th Congress
2nd Session

To permit coverage for high value clinical services used to manage 20 chronic diseases without exceeding their plan deductible.

- Allows for pre-deductible coverage on high value clinical services used to manage 20 chronic diseases
Where does the money come from to provide better coverage for evidence-based care?

- Raise Premiums
Where does the money come from to provide better coverage for evidence-based care?

- Raise Premiums
- Increase Deductibles, Copayments and Coinsurance
Where does the money come from to provide better coverage for evidence-based care?

- Raise Premiums
- Increase Deductibles, Copayments and Coinsurance
- Reduce Spending on Low Value Care
Reducing Low Value Care:
Identify

Choose services:
- Easily identified in administrative systems
- Mostly low value
- Reduction in their use would be barely noticed
Multi-Stakeholder Task Force on Low Value Care Identifies 5 Commonly Overused Services Ready for Action

1. Diagnostic Testing and Imaging Prior to Low Risk Surgery
2. Vitamin D Screening
3. PSA Screening in Men 70+
4. Imaging in First 6 Weeks of Acute Low Back Pain
5. Branded Drugs When Identical Generics Are Available
V-BID X:
Better Coverage, Same Premiums and Deductibles
Increased cost-sharing on **low-value services** reduces spending...

- Spinal Fusions
- Vitamin D screening tests
- Proton beam for prostate cancer
- High-cost diagnostic imaging

...and allows for lower cost-sharing and increased spending on **high-value services**

- Hemoglobin A1c tests
- Blood pressure monitors
- Pulmonary rehabilitation
- High-value prescription drugs
When savings from reduced use of low-value care exceed extra spending on high-value services, premiums will decrease.
HDHP Reform Goals

• Expand pre-deductible coverage on high value clinical services
  • Determine actuarial impact of resultant increase use

• Identify and measure low value care

• Create new benefit design (e.g. V-BID X) that pays for increase spend on high value care without the need to increase premiums or deductibles
“If we don’t succeed then we will fail.”

Dan Quayle
